- 2) Gradient Effect

1. Register Episode Information

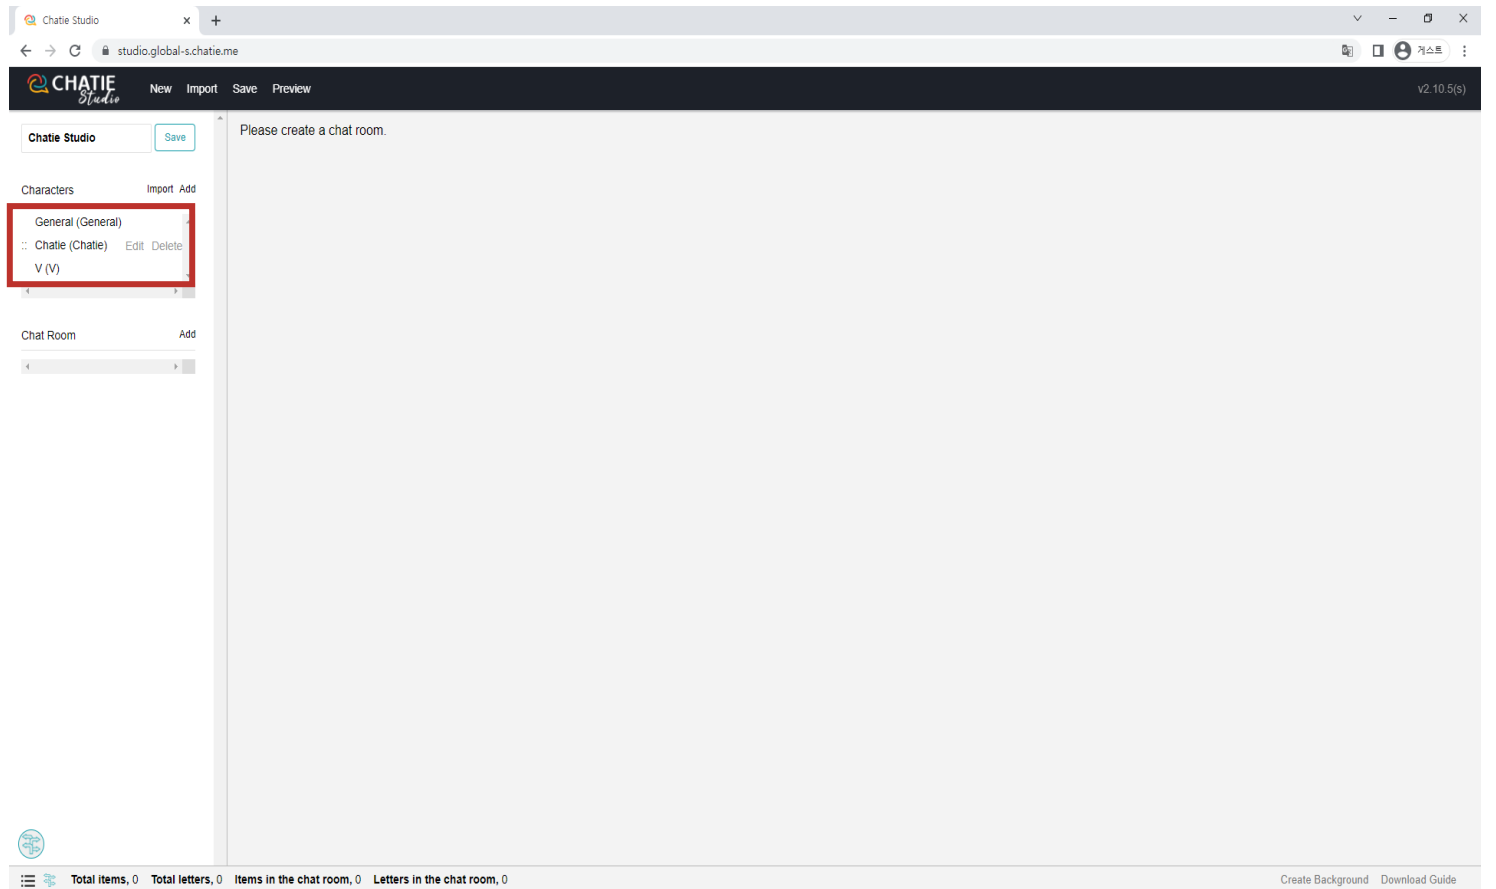

1. Register Episode Information

1. After entering the title of the episode in the field, click the "Save" button.
2. Click on the "Add Characters" section above.
 - 1) You can set your profile image with the "Add image" button.
 - 2) "Name" is used only in CHATIE Studio to identify characters.
 - 3) "Displayed name" will be shown on the final result. This is what the readers will actually see.
 - 4) "Set Reader POV Character" sets the reader's CHATIE nickname as a character's 'Displayed name'.

1. Register Episode Information

4~5.

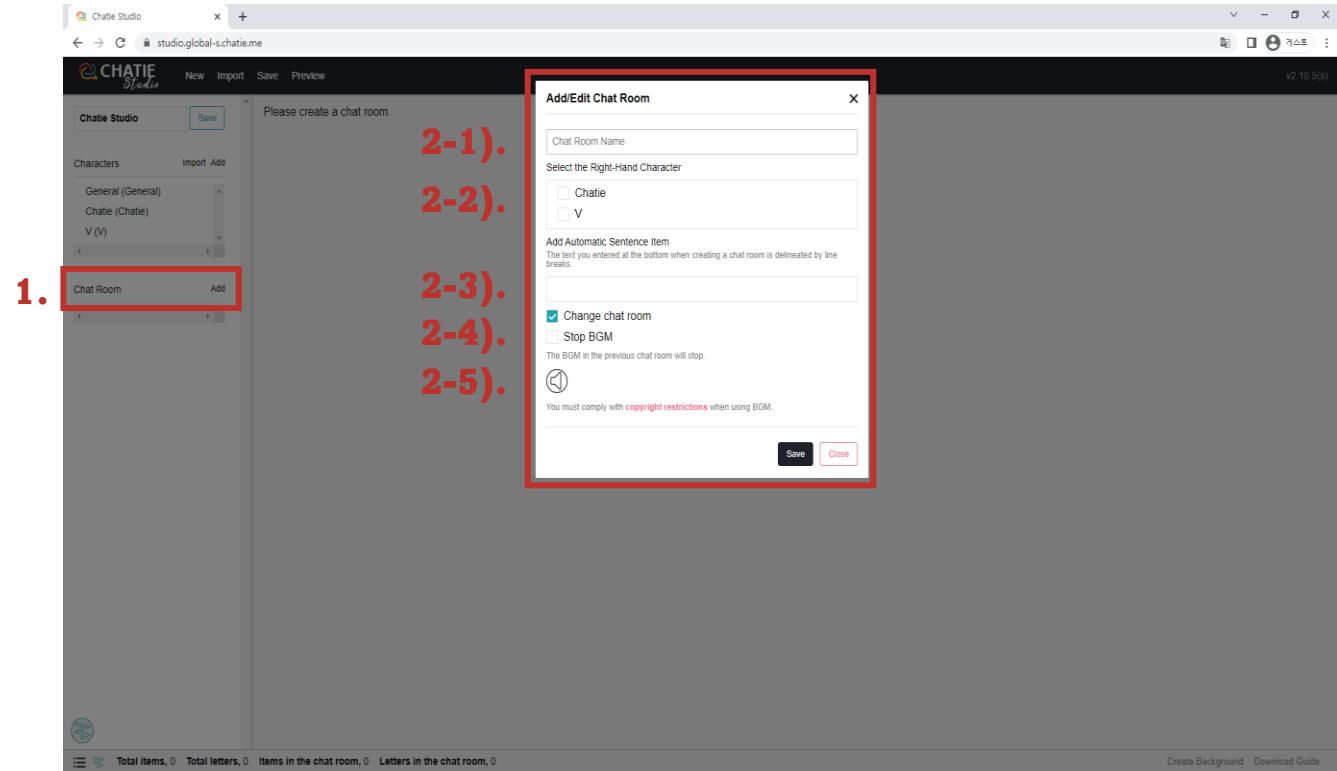

4. If you want to edit or delete a character, place the mouse cursor over the character name to reveal the "Edit" and "Delete" buttons.
5. If you want to change the order of the characters in the list: Place your cursor on the characters name, and then four dots will appear on the left side of the character's name. Grab and drag them to a position you want them to be.

1. Register Episode Information

1. Click the "Chat Room add" button above.
2. 1) "Chat Room Name" is the name of the chat room shown only in Chatie Studio.
(Readers will not see this)
- 2) "Select the Right-Hand Character " lets you decides which character is placed on the right side of the screen (on your POV)
- 3) If you enter content in the "Add Automatic Sentence Item" box, the content is automatically entered in line break units.

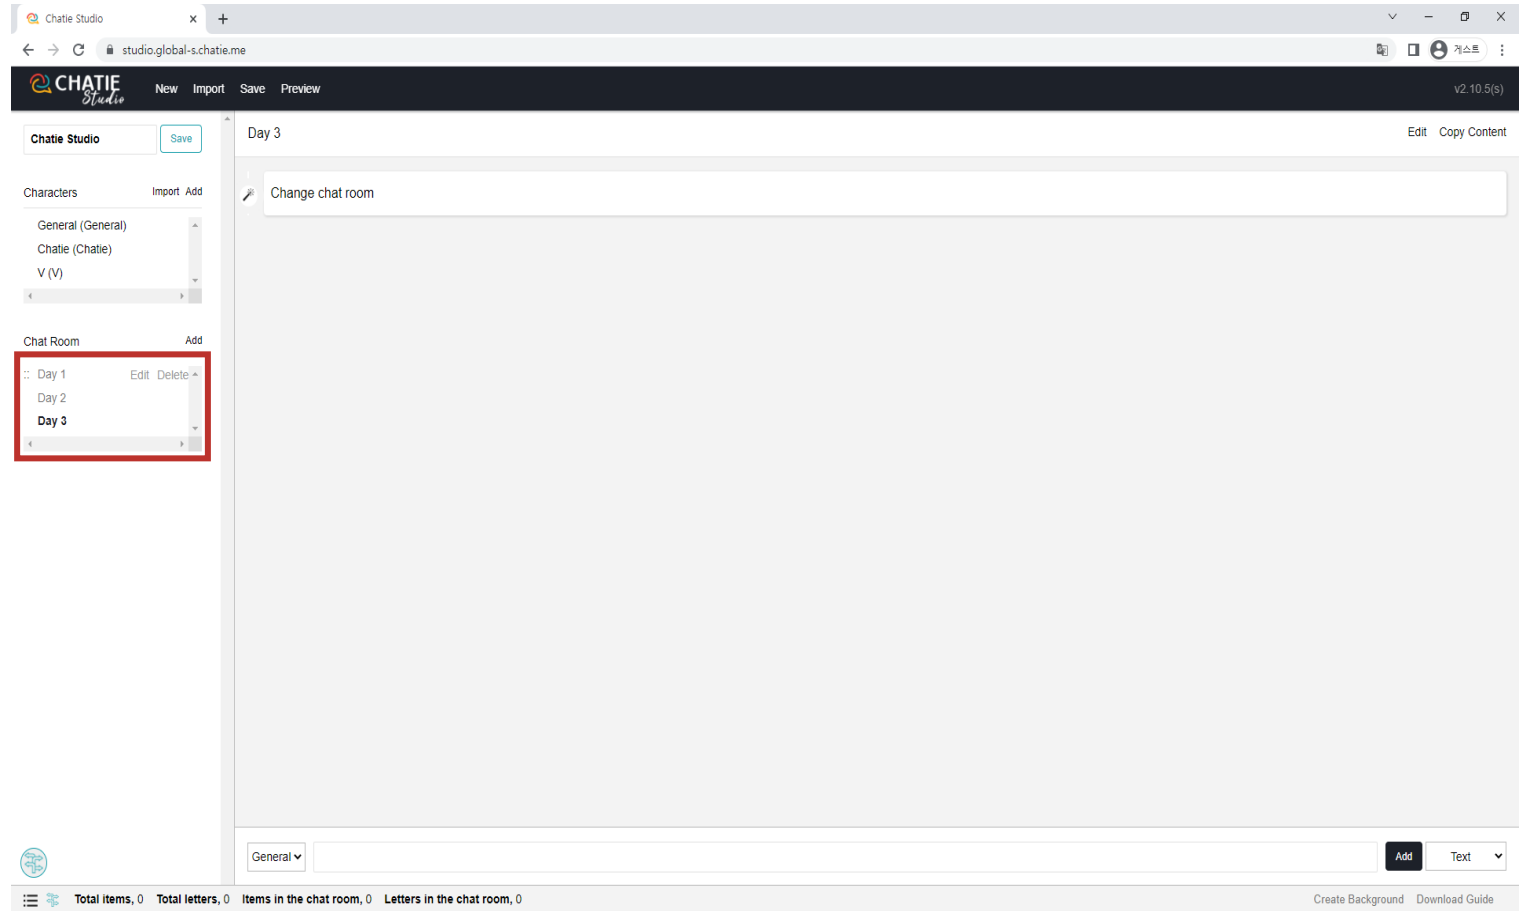

1. Register Episode Information

2. 4) "Change chat room" is a feature to select whether to connect and show conversations with the previous chat room.
- If you check "Change chat room", the chat room will be shown in a new screen.
- If you uncheck "Change chat room", the contents in former chat room won't be removed.
- 5) You can set the background sound of the chat room with the "Add BGM" icon.
- If you check "Stop BGM", you can stop the background sound of the previous chat room.

1. Register Episode Information

3~4.

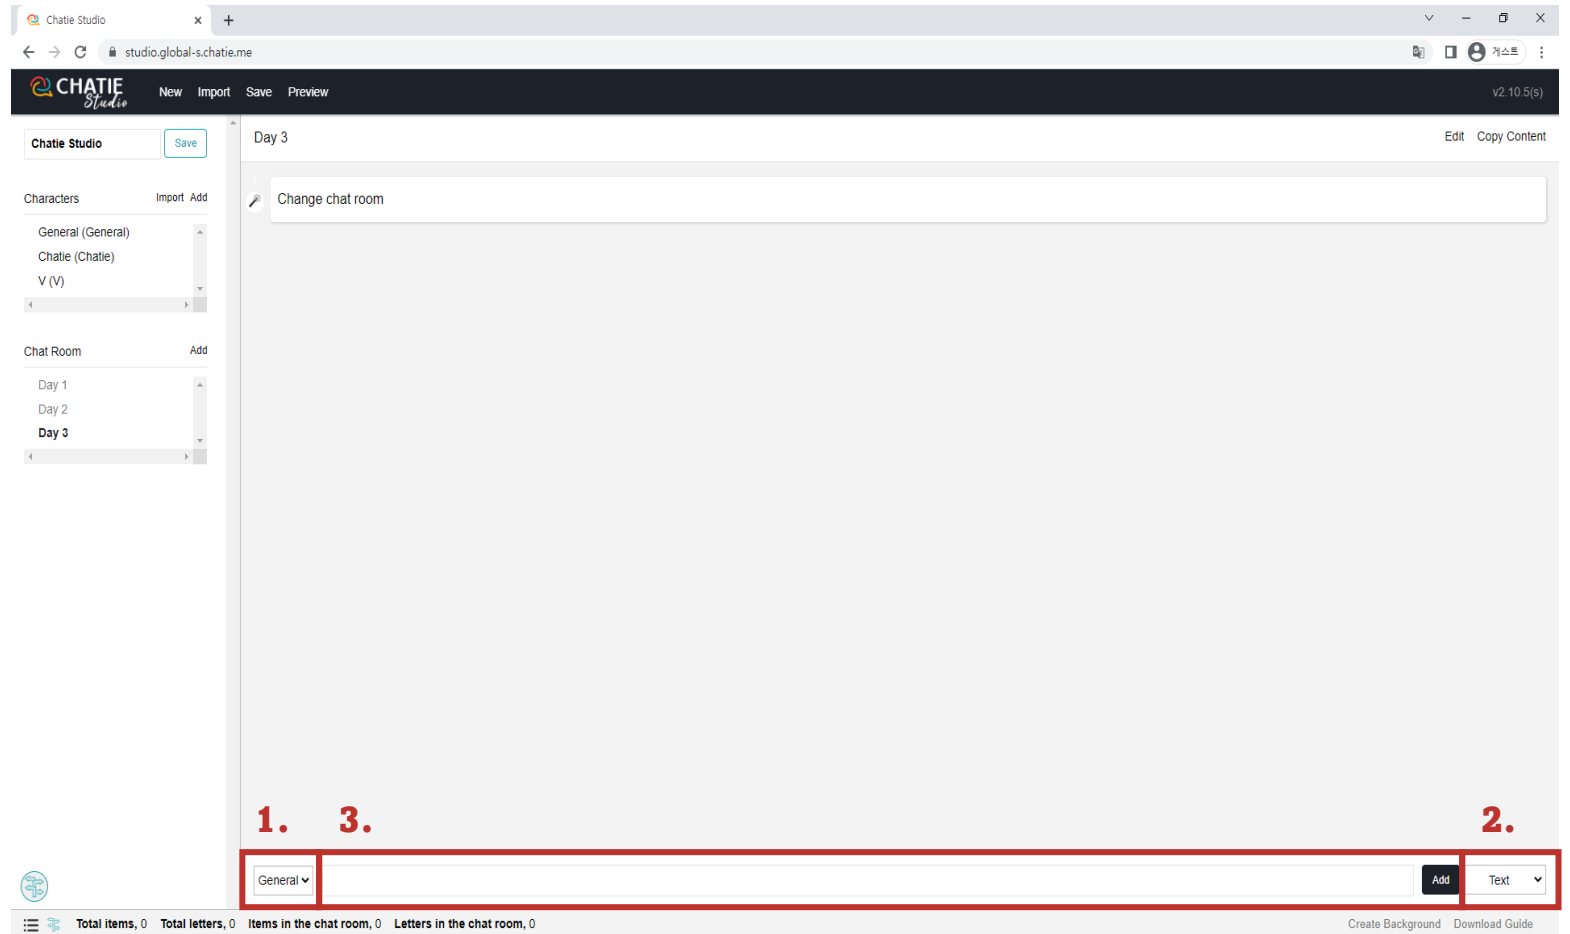

3. If you want to edit or delete a chat room, place the mouse cursor over the chat room name to reveal the "Edit" and "Delete" buttons.
4. You can change the order of chat rooms shown in the list by hovering the mouse cursor over the chat room name and dragging the four dots on the upper and bottom left.

2. Create episode

2. Create Episode

1) Enter content

1. Select a character from the area above.
2. Select the speaker's conversation type.
Besides "Text", you can enter "Narration", "Image", "Video", "Audio", and "Sound Effect" formats.
3. After writing a conversation or uploading content in the field, click the "Add" button.

2. Create Episode

1) Enter content - Introduction to conversation types

The screenshot displays the CHATIE Studio interface for creating a chat story. The main editor area shows a chat story titled "Clem and Joel _ day1" with six numbered items:

1. General (background image of a tangerine tree)
2. General (text: "Grandpa's Tangerine farm")
3. Joel (text: "Tangerine~")
4. Joel (image of tangerines)
5. Joel (video: "Tangerines remind me of you.mp4")
6. Joel (audio: "I love you may darling!.mp3")

Each item has "Edit" and "Delete" buttons. The left sidebar shows the "Characters" list (General, Joel, Clem) and the "Chat Room" list (Clem and Joel _ day1). The right sidebar shows a preview of the chat story on an iPhone (6.7.8) screen. The preview shows the chat story as it would appear to a user, with the "General" type shown as a background image, "Text" as a speech bubble, "Narration" as a translucent bubble, "Image" as a tangerine image, "Video" as a video player, and "Audio" as an audio player.

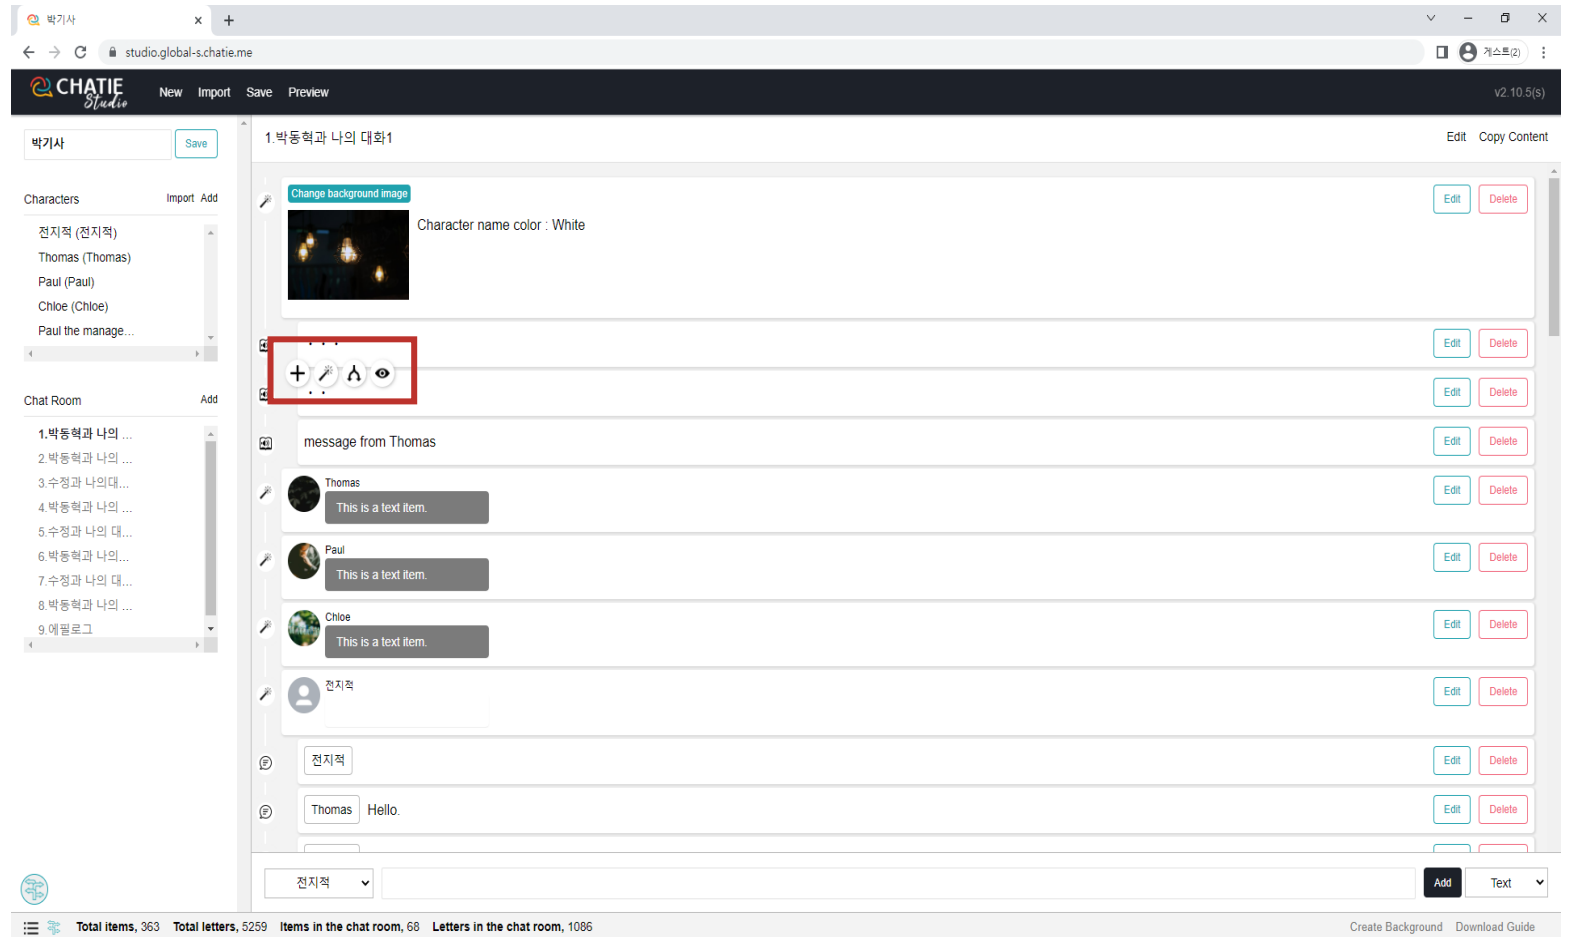

Labels on the right side of the preview window indicate the content types:

- General
- Text
- Narration
- Image
- Video
- Audio

- The "General" type is a box that can contain any type of content.
- The "Narration" type is shown in a translucent bubble in the middle of the chat room, not in a speech bubble.
- The "Video" type requires a preview picture of the video.
A preview of the video of the work is revealed first, then readers can view the video by tapping the preview.

2. Create Episode

2) Edit and Design

- Buttons for editing and design features appear when you hover the mouse cursor between each speech bubble.
 - 1) The first "Add new item" button is used to insert a speech bubble in the middle of a conversation.
